BSG is a new name to the UK – a line of handmade acoustics hailing from the Czech Republic. The 16"-wide J15F jumbo is a fine example of this maker's affordable craftsmanship. The all-solid-wood spec takes in cherry back and sides sporting handsome swirly figuring; the ultra-clean

European spruce top features a wood-mosaic rosette and rosewood purfling. Dynamics are responsive, with a sunny, grand auditorium-like clarity reinforced and balanced by a sturdy bass delivery. Just the kind of quality sound you'd expect from a smaller variety of jumbo.

BSG A27F PRO

RRP: £1217

Web: www.bsguitars.cz

This semi-thinline solid cedar/solid rosewood stage guitar, with a shape that reminds us of Yamaha's APX, is normally loaded as an electro, but we reviewed an acoustic version – and what an acoustic. Despite the modest 95mm depth, the sound has the presence and projection of a full-size guitar, with a sweet, vibrant, cleanly detailed

response and a surprisingly generous helping of bass. Our sample had extras like flame-maple binding and ebony-buttoned gold tuners, but even with a standard spec you're unlikely to be disappointed. A delightful, expressive player – and another hit from BSG.
